

Health Information Management (HIM) Advisory Services

Health Information Advisory Services for
optimal reimbursement and improved care

Intellis' commitment to quality and customer care are unparalleled in the health information management community. We listen to our customers, anticipate their needs, and respond to their requests. Through education and experience, we go beyond the assignment of diagnostic and procedural

codes; we empower clients with the knowledge and training necessary for sustainable growth. We offer decades of expertise and a full suite of HIM solutions to help streamline your HIM workflow by addressing your operational challenges that can tax your management team and HIM resources.

THE INTELLIS ADVANTAGE

ELEVATING THE BUSINESS OF HEALTHCARE

Our HIM Team offers complete coding, auditing, education, and interim management support services as well as full sourcing of department processes to deliver the speed and accuracy needed to help your organization reach its fullest potential. Customized for your specific needs, our services seamlessly augment your team on a permanent, interim or as-needed bases during volume peaks and times of employee turnover, illness, leaves of absence, and vacations. Backed by over 300 years of combined HIM experience, we serve as a valuable extension of your team to ensure on-demand availability of accurate and complete patient records throughout the HIM workflow.

IntelliScope, our prospective value calculation tool, supports our services ensuring the accuracy of our data analytics and projecting reimbursement losses and gains.

Elevating the
Business of Healthcare

Our HIM Advisory Services

Clinical Documentation Improvement (CDI)

Our approach to Inpatient and Outpatient CDI, whether it's a first implementation or an existing revitalization, is physician-centric, data driven, and customized with continued support.

Patient Safety Indicators (PSIs)

Monitoring and controlling PSIs has become increasingly important in healthcare and will have a direct financial impact on providers and hospitals alike. Payment based on the quality of care is a new standard and will drive healthcare providers and institutions to provide the best possible care to patients or suffer significant financial losses.

Mortality Reviews

Hospital death rates are important indicators of the quality of patient care. Above average mortality rates will negatively impact a facility and may not be reflective of the actual patient population. Many measures of hospital and provider publicly reported data are based on mortality metrics. Often facilities are providing the appropriate care but miss out on important accurate documentation to capture the full clinical picture.

Our Service Line Leader

Kristy Evans RHIT, CCS, CPC, AHIMA Approved ICD 10 CM/PCS Trainer
Vice President of HIM Operations

Kristy has more than 20 years of HIM & Revenue cycle experience in the facility and professional fee arenas. She is an expert in auditing, coding, education as well as CDI. Kristy has held positions both on the vendor side, facility and physician pro-fee environments.

Kristy has a proven track record of success in teaching adult learners. She has educated new coders, CDI professionals, payers, physicians and other clinicians. Kristy's passion and commitment to the field can be seen in her professional and academic accomplishments and credentials, RHIT, CCS, CPC, AHIMA Approved ICD CM/PCS Trainer as well as a Summa Cum Laude college graduate.

Our Proven Expertise

- ✓ Conveys advanced knowledge of CMS landscape and standards
